

SPIRA BRASS

ARCHITECTURAL HARDWARE

PRODUCT CATALOGUE ISSUE | 4.0

OUR VISION...

As the discerning customer gets more conscious of their interiors, Spira Brass emerges as a brand that promises luxury. This experience can be enjoyed by any individual who uses Spira Brass diverse product range. The principles of Spira Brass of through research and superior designs have been instrumental in developing its products ranging from furniture accessories and door hardware. In fact, our R&D team ensures a first class experience.

The founders of Spira Brass took it upon themselves to satisfy rapidly increasing market demands of superior quality hardware products that also promise innovation and sustainability. Not just that, Spira Brass can customize products on the basis of your needs or a specific project, thereby redefining the industry's standards. We hope to be the new benchmarks of high-quality and luxury architectural hardware.

SPIRA BRASS
ARCHITECTURAL
HARDWARE

ABOUT US

Spira Brass was established with the principal objective of supplying unique, quality hardware for the discerning customer. The products we offer are manufactured at our own manufacturing facility enabling us to offer an immense range, from classic door knobs through to bespoke decorative hardware in a wide variety of finishes.

Here at Spira Brass we are committed to supplying some of the best quality Door Hardware and Ironmongery to customers all over the UK. We try to supply ironmongery for all tastes, from traditional to contemporary with as wide a range of finishes as possible.

We also specialize in custom hardware and by working closely with Interior Designers and Architects we can develop designs into real pieces.

Our unrivaled and extensive knowledge of both traditional and contemporary products for the UK, European and American Markets, allows us to provide an individual, holistic service to all our clients.

Specified by discerning clients the world over, Spira Brass products may be found in various heritage renovations as well as prestigious new establishments.

Our commitment to manufacturing and supplying only the best continues with our collections of hand finished door knobs and quality British-made inserts.

All Spira Brass range is designed to meet current standards and is subject to detailed inspection throughout production.

We are also committed to leading the industry in minimizing the impact of its activities on the environment.

PRODUCT FINISHES

We sincerely think that luxury is in the details, thus we take great delight in delivering our customers over 20 finishes to guarantee your hardware has the look and feel you prefer.

Polished Chrome (PC)

Polished Chrome is a bright, highly reflective finish. It looks bright and glossy because of its surface, which reflects light like a mirror. In order to achieve a smooth and reflective finish, the chrome surface must be polished to a high sheen. This finish is perfect for most environments and is incredibly durable. It complements modern design schemes perfectly and has a cool tone.

Antique Brass (ANT)

Antique Brass has a rich dark brown colour with a slight golden tint and visible brush marks in the surface. An applied finish called "antique brass" is used to give brass objects a worn-out, aged appearance. The rich, dark finish of our antique brass products is then preserved and protected with a layer of premium clear lacquer.

Aged Brass (AB)

Our Aged Brass finish, which is hand applied over solid, unlacquered brass, gives pieces a warm, golden color that is accentuated with a dark ageing. This finish is one of our "living finishes," which means that it will continue to take on new characteristics as time goes on. It has a gently aged appearance. The unlacquered brass underneath will be shown when the finish gradually wears away in contact areas with use. The brass will then tarnish and oxidize beautifully.

Aged Bronze (ABZ)

Aged Bronze's brown appearance gives it a rich, subdued color that is somewhat reminiscent of chocolate with some visible brush marks in the surface. Because it is very difficult to see flaws in a matt finished product, its matt finish makes it appear non-shiny and very smooth and consistent. Because of its classic, clean, and modern design, this finish is well-liked in both traditional and contemporary spaces.

Satin Nickel (SN)

Satin Nickel has a unique, warm, gold/yellow tone. It comes with more lacquered shine. It doesn't discolor or tarnish with time. It is less prone to showing fingerprints and water spots and can hide minor scratches and blemishes more effectively.

Polished Brass (PB)

Polished brass means that the handle is lacquered, which protects the appearance over time. Polished brass has a typically goldish tone and is easy to look after. The lacquered finish makes sure that the handle does not oxidize and darken, but instead keeps its shine. Polished brass tends to be bright and shiny, and very reflective.

Gunmetal Grey (GG)

Gunmetal Grey is a unique blend of grey, silver blue with a metallic feel. This color is serious, given the depths of its shades of grey and blue. Gunmetal Grey brings a certain level of authority and timelessness in designs. Whether your Gunmetal Grey hardware is going against a backdrop of white, black, timber or just about any other finish, gunmetal looks great.

Satin Chrome (SC)

Satin chrome acts almost like a matte finish with less glare and very light, textured brushing. Its blue traces and less reflective appearance gives satin a rich and silky, almost fabric-esque finish - as the name suggests. Satin is therefore better suited to modern homes, contemporary apartments and minimalist aesthetics that capitalise on understatement and demure visual allure.

Matt Black (BLK)

Black Door Hardware can be an interesting alternative to the more standard satin chrome and brushed nickel finishes. Our Matt Black finish is matte powder coated. It is a long lasting finish and unlike polished finishes, matte black creates a smooth appearance that is less likely to reveal any stains or fingerprints. Since it's not reflective, it can also hide small scratches or scuff marks on the surface.

**Beeswax
(BX)**

The most natural finish for steel is our Beeswax finish. The steel retains colours ranging from blue to a deep red ochre after forging. Our beeswax goods are dipped into hot beeswax to retain their lovely hues. When the items are fitted internally and kept up correctly, this gives the metal a subtle, matt richness and provides great protection. It allows the natural colour and grain of the metal to stand out. Beeswax is non-toxic and is completely environmentally friendly.

**Polished Nickel
(PN)**

Polished Nickel is a bright mirror finish nickel plate on polished brass. It is a metallic finish whose glowing hues give it an overwhelmingly warm feel. It has yellow undertones, and a deeper finish that goes well with soft neutrals and warm colour schemes. Think of it as a mellow silvery finish, compared to the bright reflectiveness of Chrome.

**Aged Nickel
(AN)**

The beautiful silver sheen of aged nickel is accentuated by darker striations that highlight the product's intricate details. Before any 'ageing' is done, a coat of nickel plating is added to solid brass product to create a 'plated finish'. Our aged nickel-plated brass products are built to last a very long time.

**Electro Brass
(EB)**

A brass finish applied to product by electroplating appears similar to brass and is used in furniture or architectural fittings like hinges. An electro brass plated finish is often directly used to finish polished iron or as an intermediate layer for subsequent nickel plating.

**Satin Brass
(SB)**

Satin Brass is a subtle brushed finish and an elegant shade of brass, this is a unique finish which balances the line between heritage distinction and the sleek, clean tones of modern design. In these products, the lacquer protects the finish, ensuring it remains bright even after being used thousands of times.

**Pewter
(PEW)**

The Pewter finish is usually nickel plating on brass which has been dulled and darkened to simulate pewter. This may also be referred to as pewter. Our pewter patina products are made of hand-forged steel using traditional English blacksmithing methods. The designs are based on timeless classics but hand-forging means no two pieces are identical. The pewter patina finish is elegant and beautifully highlights the texture of the steel.

**Antique
(AT)**

Our Antique door knobs are unlacquered and made from solid brass which has been chemically aged to give a beautiful antiqued finish. The darker tone of antique is a popular choice, offering period character detail for your home. Antique brass knobs have timeless appeal and bring sophisticated elegance to any room.

**Hot Steel
Galvanised
(HSG)**

Hot Steel galvanised is mostly used on Garden gate fittings in which the products are dipped in hot galvanised to make it more weather resistant.

**Epoxy Black
(EXB)**

Epoxy Black is mostly used on Garden gate fittings in which the products are Black powder coated to make it more weather resistant.

**Ivory
(IV)**

Ivory is an off-white finish achieved using powder coating technique and is used on our Aluminium levers on rose.

**Black Nickel
(BN)**

Black nickel has a black tint on a nickel finish. A polished nickel finish is mirror-like but with a silvery tint, black nickel gives a darker. Essentially, it is a black, mirror-like finish.

**PVD Brass
(PVDB)**

PVD brass is a rich golden colour that produces a very high mirror-like shine. PVD is very similar to polished brass in this respect, but the PVD has a slightly richer hue. Our PVD Brass comes with a 25 year finishing guarantee.

**Polished Brass
Unlacquered
(PBUL)**

The product is hand polished to a smooth mirrored finish. As this is a living finish, the finish will naturally oxidise and patina over time. This can be prevented with regular polishing.

**Matt Antique
(MANT)**

Our Antique door knobs are unlacquered and made from solid brass which has been chemically aged to give a beautiful antiqued finish. The darker tone of antique is a popular choice, offering period character detail for your home. Antique brass knobs have timeless appeal and bring sophisticated elegance to any room.

BLACKSMITH SERIES

SALT SPRAY TESTED

our product have been "Salt spray tested" to over 700 hours. Far greater than given to other manufacturers more expensive products. Therefore, our Blacksmith range has improved durability and life.

FIXINGS

Flat and raised head screws are black passivated stainless steel, providing corrosion resistance and durability.

MECHANISM

Stainless steel mechanism, washers and cams offer increased durability and endurance, allowing for a softer and more progressive lever operation.

CAST BASE METAL

Extremely durable high quality Malleable Iron base metal shot blasted before protective coating are applied

OUTER COATING

UV colour fast black powder coated reduces the likelihood of fading and better resists oxidation. All coating are from recognised global brands no recycled material is used.

INNER COATING

A protective zinc rich powder coat finish is applied under the decorative finish to provide further

Cast Base Metal
